

EventNear

Local Event Vendor Directory

Sanika Kangane · B.Tech CSE · ITM Skills University · Academic Year 2026–27

01 / Business Concept

EventNear is a proposed hyperlocal two-sided marketplace connecting event organisers with verified local vendors. It centralizes vendor profiles, indicative prices and availability information so customers can discover and contact suitable services more efficiently.

₹799/month

Vendor profile, visibility and enquiries

Free customer access

Discover and contact local event vendors

02 / Problem, Opportunity & Target Segments

THE PROBLEM

- Information is scattered across social media, referrals, search and offline networks.
- Repeated searches and calls make price, availability and trust comparisons difficult.

THE OPPORTUNITY

- Bring verified vendors, indicative prices, availability and enquiries together.
- Build sufficient vendor density in one locality before expanding.

CUSTOMER SEGMENT	EXAMPLES / NEED
Event organisers	Weddings, birthdays, engagements, anniversaries
Corporate organisers	Meetings, launches and office events
College/community organisers	College fests, society events and local functions
Event vendors	Decorators, caterers, photographers, DJs, makeup artists and planners

03 / Value Proposition & Customer Journey

EventNear helps event organisers quickly discover and contact verified local event vendors through a single platform with vendor profiles, indicative prices and availability information.

Customer Profile

CUSTOMER JOBS

Find suitable vendors;
compare options;
stay within budget;
book services.

PAIN POINTS

Scattered information;
unclear prices; repeated calls;
trust concerns;
uncertain availability.

DESIRED GAINS

Faster discovery;
verified profiles; price ranges;
availability information;
easy enquiry.

Value Proposition Canvas

CUSTOMER NEED	EVENTNEAR RESPONSE
Find vendors quickly	Category and location search in a local directory
Trust vendors	Verified vendor profiles and customer reviews
Compare costs	Indicative price ranges
Check availability	Availability information and enquiry flow
Contact vendors	Structured enquiry form with event details
Find multiple options	Dense local vendor network across categories

End-to-End Customer Journey

Need → Search → Compare → Enquire → Respond → Book → Deliver → Review

Need: Identify service; relevant categories.

Search: Select location, service and date.

Compare: Review profiles, prices and availability.

Enquire: Submit requirements; enquiry routed to vendor.

Respond: Vendor confirms or quotes.

Book: Confirm service; booking coordination.

Deliver: Vendor performs the service.

Review: Customer shares feedback through ratings and reviews.

04 / Operational Flow & Supply Chain

Vendor sourcing → Registration → Verification → Profile creation
 → Services / pricing / availability → Customer search → Enquiry
 → Vendor response → Booking → Service delivery → Customer review

RESPONSIBILITY	ACTIVITIES
EventNear	Vendor acquisition and verification
Vendor + EventNear	Vendor registration
Vendor	Profile, availability, quotations and service delivery
Customer	Search, enquiry submission, review and feedback
Customer + Vendor	Booking coordination

Key touchpoints: Verify identity, contact and business/service details before publishing. Filter by category, location, price range and availability. Capture event type, date, location, guest count and budget. Vendors accept, decline or quote. Clarify customer/vendor responsibilities; collect reviews and provide basic complaint handling.

05 / Business Model, Revenue, Costs & KPIs

Two-sided marketplace: event organisers access the directory for free; vendors pay a recurring **₹799 per vendor per month** for a profile, visibility and customer enquiries.

REVENUE MEASURE	CALCULATION	RESULT
Monthly vendor revenue	100 paying vendors × ₹799	₹79,900 / month
Annual vendor revenue	₹79,900 × 12	₹9,58,800 / year
Pilot monthly revenue	75 paying vendors × ₹799	₹59,925 / month

Basic case calculations: subscription revenue before operating costs, not profit.

MAJOR COST CATEGORIES

- Platform development and maintenance
- Hosting, domain and software tools
- Vendor acquisition and verification
- Digital and local marketing
- Customer support and operations
- Sales and partnership activities

KEY PERFORMANCE MEASURES

MRR: Paying vendors × ₹799
Vendor conversion rate: Paying vendors ÷ vendors contacted × 100
Enquiry-to-booking rate: Confirmed bookings ÷ total enquiries × 100
Vendor response rate: Responded enquiries ÷ total enquiries × 100

06 / SWOT, Risks & Mitigation

STRENGTHS

- Hyperlocal focus and verified vendor profiles
- Free customer access
- Centralized discovery

OPPORTUNITIES

- Expansion to nearby localities
- Venue partnerships; additional categories
- Growing digital discovery

WEAKNESSES

- Low initial awareness; limited launch selection
- Verification requires effort
- Dependence on vendor updates

THREATS

- Existing competitors and fake information
- Poor vendor service
- Vendor churn

RISK	POTENTIAL IMPACT	MITIGATION
Fake or unreliable vendors	Customer trust may decline	Verify vendor identity and business details
Low vendor density	Too few customer options	Focus acquisition on one locality first
Low customer traffic	Insufficient value for vendors	Local digital marketing and partnerships
Vendor churn	Recurring revenue may fall	Useful enquiries, profile insights and support
Poor service quality	Complaints and negative reviews	Ratings, reviews and complaint handling
Outdated availability	Contact with unavailable vendors	Encourage regular availability updates

07 / Go-To-Market Strategy

Begin with a hyperlocal pilot. Create meaningful choice across major event-service categories in one locality before launching across multiple cities.

Direct vendor outreach: Calls, WhatsApp and in-person contact with local vendors.

Local partnerships: Banquet halls, venues, planners and community organisations to identify vendors.

Social media: Instagram, Facebook, LinkedIn and WhatsApp communities.

Community partnerships: Colleges, housing societies, community centres and event venues.

08 / 90-Day Pilot-to-Scale Plan

DAYS 1-30

Build supply
30 verified vendors

Recruit and verify vendors; create profiles;
prepare the basic platform.

DAYS 31-60

Test demand
50+ customer enquiries

Launch customer discovery; run marketing;
collect enquiries and feedback.

DAYS 61-90

Improve and scale
75+ verified vendors; 100+ enquiries

Increase vendor density; improve response and
booking flow; evaluate service categories.

09 / Pilot Success Criteria

75+ verified vendors

By Day 90

100+ enquiries

Customer enquiries by Day 90

- **60%+** vendor response rate
- **20%+** enquiry-to-booking conversion
- **₹59,925** monthly vendor subscription revenue at **75 paying vendors**

10 / Demo Flow & Conclusion

The prototype should demonstrate the core customer experience rather than attempt to build every marketplace feature.

- 1. Home:** Value proposition and entry points.
- 2. Search:** Location, service, date and budget.
- 3. Vendor List:** Multiple local vendor options.

- 4. Vendor Profile:** Verification, services, price range, availability and reviews.
- 5. Enquiry:** Event details and requirements.
- 6. Confirmation:** Successful submission.

EventNear addresses fragmented vendor discovery through one hyperlocal platform. Free customer access reduces adoption barriers, while the ₹799 monthly subscription provides recurring vendor revenue. The 90-day pilot validates vendor acquisition, customer demand, enquiry activity and booking conversion before broader expansion.

Key takeaway: build enough verified vendors to attract customers, and enough customer enquiries to make the ₹799 vendor subscription valuable.
